Raunak Raj Adhikari

Backend Developer

I'm an enthusiastic learner who has a strong interest in backend programming. I enjoy taking on new challenges and exploring challenging issues to come up with creative solutions. Using a combination of technical knowledge and creativity, I try to create projects that not only benefit me but also other users.

SEE (Secondary Education Examination)
Pathshala Nepal Foundation
2017 - 2022

10+2
Pathshala Nepal Foundation
2022 - 2024

PERSONAL PROJECTS

Pathshala Routine App (2022)
- This app allows admins to create schedules for students and teachers, allowing access to their own schedules and generating lists of available students for specific time slots.

Music Streaming Service (2024)
- This is a music streaming service made using Spotify API that allows users to search and play music of their choice.

Bluetooth Controlled Car (2020)
- This project involves crafting a toy car using electronic components such as Arduino, Bluetooth Module, Motor Controller, etc. Users can control the car remotely via Bluetooth.

Googles PaLM 2 API Chat (2024)
- This project involves engaging in direct conversations with an AI model, constructed using Google's Pathways Language Model, PaLM, facilitating one-on-one interactions.
